Armand Thierry SAS

Levallois-Perret, France

Apr. 2014 - Dec. 2015

IT Retail Project Manager

I developed the management of the 500 stores of the group in France, Belgium and Luxembourg (cashing, marketing, electronic payment, counting ...)

- Develop and manage schedules
- Manage day-to-day operational aspects of the projects
- Develop, monitor and control the budget for the projects
- Develop requirements specifications
- Provide 3rd level support to the 500 stores

Moneo Applicam

Paris, France

Jan. 2014 - Mar. 2014

Electronic banking Qualification Assurance Analyst

- Create test plans with clearly defined test objectives
- Execute test plans and test cases to compare results with requirements and identify defects
- Document product deficiencies clearly and note repeatable steps and workarounds
- Communicates test results with development teams
- Works with the manager to schedule and prioritize tasks to promote efficient use of time
- Validate corrected issues

Galleries Lafayette

Paris, France

Sept. 2012 - Dec. 2013

Retail Business Analyst

I acted as the interface between technical development teams and end users in an automation project for the discounts at the point of sale and various projects.

- Prepare and maintain detailed test plans, test cases, test execution, acceptance criteria and test scenarios, verification of work requests, and bug reports using defect-tracking tools
- Liaise with developers and programmers to swiftly resolve defects
- Interview end users and management
- Examine and modify the functional requirements
- Write and publish user manuals

Objectives reached: Reduce by 10% test-conception phases thanks to new process of reusability-of-existing test cases. Reduce by 90% manual transactions. Satisfy client expectations (time and budget).

+ PROFILE

I have proven myself by successfully completing IT projects (references upon request) with 4 years of experience in France and Taiwan.

+ KEY SKILLS
